# ROTARY CODED SWITCHES SA-5000

RoHS compliant

■ FEATURES

● RoHS compliant
● Washable
● Easy pulling-up or pulling-off (A & B type)
● PC board space saving due to contained resistor/diode
● No need of cross pattern P.C.B. design
● Resin material is UL Recognized 94HB

The "SA-5000 Series" are divided into 3 types according to the kind of a built-in circuit.

● **A type: Built-in resistors (Housing color   Yellow)**
   In order to use conventional code switches in a digital circuit, pull-up or pull-down resistors must be connected externally. This type contains these resistors.

● **B type: Pulling-up resistors and built-in diodes**
   (Housing color   Red)

● **C and D type: Built-in diodes (Housing color   Black)**
   When using more than one code switch arranged as a code of plural figures, the digital circuit makes a comparison of signals received through a line called a common bus line as its own method. For this, it is necessary to connect a diode for preventing reverse current to the middle of output terminal of each switch and a bus line. The product is a hybrid switch integrating such a diode. Diodes of C and D types are set in a reverse direction.
