Ultra-Miniature Illuminated Pushbutton Switches

RoHS Compliant

Series

Conductive Rubber Contact (TR type)
Metal Contact (TM type)

Features

1. Two Types of Contacts

TR series: Conductive rubber contact for soft tactile feel.
TM series: Metal contact for sharp tactile feel.

2. PC Board Mount

Terminal pitch is in inches (multiples of 2.54 mm) for all models.
The unique terminal shape prevents the terminal pins from coming loose from the PC board during dip soldering.

3. Enhanced Resistance to Soldering Heat

Improved terminal structure protects the contacts from soldering heat.
In addition, each pole has two terminals which can be used as a jumper wire.

4. Ultra-Miniature Switch with LED

LED is built into miniature housing.

5. Wide Variety of Accessories

A wide variety of accessories are available, including color buttons and mounting frames.

Handling Precautions

LED circuit	<p>Current to be applied to the LED must be lower than the forward current (IF) indicated in the LED Specifications of each switches. Resistance value R should be calculated using the formula on the right.</p>		<p>Calculation Example : E = 5 V IF = 2.0mA</p> $R = \frac{E - V_F}{I_F} = \frac{5 - 2.0}{0.02} = 150\Omega$ <p>Use VF=2.0V to calculate.</p>
Accessories mounting	 <p>1. Installing the mounting frame Install the mounting frame so that the tab on the frame is in the same direction as the slot on the switch.</p>		 <p>2. Installing the button Install the button so that the recess on the button is in the same direction as the protruding portion on the switch.</p> <p>The mounting frame cannot be installed with the switch button installed.</p>

Ambient Conditions

- (1) In case of switches with silver-plated contacts, do not use in an environment where there is corrosive gas such as sulfuric or ammonia gas which may affect the silver plating.
- (2) TM and TR series are open-structure switches and should not be used in a dusty environment.

Soldering Specifications

Series	TM	TR
Manual soldering	380°C Max. 3sec. Max.	380°C Max. 3sec. Max.
Auto soldering	275°C Max. 6sec. Max.	265°C Max. 6sec. Max.

• Preheating in the flow line should be 80°C to 120°C and within 120 seconds.

- Do not dip solder the switches with color buttons or mounting frames attached.
Soldering heat may deform the accessories or cause ingress of flux.

Flux Cleaning

- (1) Solvents : Fluorine or Alcohol type
- (2) The TM/TR series are not washable. To wash the PC board, clean the soldering surface of the PC board with a brush so that the switch is not exposed to the cleaning solution.
- (3) After soldering, wait until the temperature of the terminals cool down to 90°C or below or until the parts are exposed to room temperature for more than 5 min. before washing.
